### **BACKGROUND**

Brook School for the Deaf and Autistic Children is a nonprofit Learning centre for children with special needs located in Kasarani, Zimmerman estate Nairobi-Kenya. The disabled children include; Deaf, Autistic and cerebral pulse children who are orphaned, with both parents but from poor backgrounds in accordance with the Act of Parliament, Disability Act of 2003, The Kenya Constitution-Children Act of 1983, Ministry of Gender and Children under National Council for Person with Disability and Ministry of Education (special education) Guidelines.

The school was established by **Kenya Deaf Agenda**. The organization was founded to cater for the welfare of the disabled children within our society through; Curriculum Education, vocational training, rescue and rehabilitation of Deaf, Autistic, Cerebral pulse children from poor families and informal settlements.

### **ACTIVITIES**

Kenya Deaf Agenda is involved in Garbage- Environmental conservation and management collection in our local community. This goes for a small cost per month that in turn goes to support our school. The more we get customers, the more we support and involve disabled children.

All Children have Constitutional Right to Decent Life, Education and Dignity as human beings. It's in this spirit, that, our school was founded to counter an increasingly challenging number of Deaf, Autistic and cerebral pulse children within our communities to enable them to acquire affordable quality education or marginalized society members just like normal children. Our school alternatively serves as a rescue/rehabilitation center for the children with hearing impairment who are orphaned, homeless and on the streets in Kenya towns.

Autism is a development disorder has no cure and affects 1 in every 166 children born. It is in this regard, that, we firmly focus on the talent development for the disabled children for their future self-reliance. Occupational Therapy, Physical Therapy, Sports, Clubs, Sign Language
